

Invitation to Serve as a Climate Solutions Station Facilitator

Are you concerned about climate change? Do you enjoy working with middle school students? Would you enjoy helping students engage in a hands-on learning experience?

If so, we encourage you to join us as a Climate Solutions Station Facilitator to inform students about our region's 2030 climate goal, the solutions in our region's Climate Action Plan, relevant workforce opportunities, and to facilitate hands-on learning experiences for students.

We are looking for people who:

- Relate easily and enjoy working with middle school students.
- Are comfortable sharing a short explanation about a station (an exhibit) with students who briefly visit several stations during our Keystone Lesson offered in classrooms or our Climate Solutions Fairs offered in gyms (we provide the information you can share).
- Are available 5-15 hours per month in the winter and spring to:
 - Facilitate one or more stations at lessons or fairs (lessons are about 45 minutes and are often facilitated more than once in a day; fairs offer half day or full day shifts).
 - Support our lead facilitator when offering lessons and fairs.
- ✓ Very flexible time commitment. We ask each Station Facilitator to devote 5-15 hours a month to facilitate stations in classrooms or fairs in the winter and spring (typically January to May). We schedule these lessons in advance with your availability in mind.
- ✓ How we support you. We provide an orientation to the Vision 2030 Team and closely review with you our Keystone Lesson materials. We also provide hands-on support to prepare you to co-facilitate the lesson with our other facilitators. Candidates will complete a background check prior to serving as a volunteer.

SAGE's Vision 2030 team includes students, teachers, volunteers and nonprofit and governmental organizations who support a local, place-based approach to educate middle school students about our region's efforts to reduce greenhouse gas emissions 50 percent from 1990 levels by 2030. Learn more about our efforts at [WeAreSage.org/join-a-team/climate-education-team/](https://www.WeAreSage.org/join-a-team/climate-education-team/).
